Sangamner | niranjan.jathar@gmail.com | 9158716817 | Portfolio | LinkedIn

## Summary

---

**Experienced Software Engineer** with 3 years and 6 months of hands-on experience in building responsive, high-performance web applications using **React.js**, **TypeScript**, and **JavaScript (ES6+)**. Skilled in creating scalable frontend architectures with React.js, focusing on **component-based development**, **API integration**, and **performance optimization**. Knowledge in backend technologies such as **Node.js**, **Express.js**, **Mysql** with a solid understanding of building **RESTful APIs** and backend workflows. Familiar with **AWS services** such as EC2, S3, and basic deployment practices, with an understanding of cloud-based application architecture and scalability. Quick to learn and adapt to new technologies, with strong experience working independently and within **Agile teams**, along with excellent **client communication** and **cross-functional collaboration** skills.

## Education

---

**Matoshri College of Engineering & Research Centre, Pune University,** Completed 2019  
Bachelor of Engineering in Computer Science(Grade : First Class)

## Skills

---

**Frontend Skills:** HTML5, CSS3, JavaScript (ES6+), TypeScript  
**Frontend Frameworks & Libraries:** React.js, Next.js, Angular  
**State Management:** Redux, Zustand, React Context API  
**UI Component Libraries:** Material UI (MUI), Bootstrap, Tailwind CSS  
**Build Tools & Package Managers:** Vite, npm, Webpack, Babel, ESLint, Prettier  
**Testing & Performance:** Jest, Mocha, Unit Testing, API Testing  
**Cloud & Deployment:** Docker, CI/CD pipelines, AWS (Amazon Web Services)  
**Version Control & Collaboration:** Git, GitHub  
**Browser Tools & Debugging:** Chrome DevTools, React Developer Tools  
**Backend Technologies:** Node.js, Express.js, RESTful APIs, MVC Architecture  
**Databases & Design:** MongoDB, Database Schema Design, Mysql, Database Design  
**Development Tools:** Visual Studio Code, Postman, Jira, DBeaver  
**Methodologies & Practices:** Agile, Scrum, Code Reviews, Pair Programming, Accessibility (WCAG)

## Experience

---

**Software Engineer**, Winjit Technologies – Nashik Feb 2023 – July 2025

- Engineered dynamic, interactive user interfaces utilising **React.js** within a **component-driven architecture**.
- Crafted clean, maintainable code in **JavaScript (ES6+)** and **TypeScript**, aligning with industry standards and best practices.
- Developed scalable and maintainable applications using **Angular**, leveraging component-based architecture, dependency injection, and modular design.
- Executed efficient state management strategies with **Redux** and **Zustand** to navigate complex application logic.
- Enhanced application performance through **lazy loading**, **code splitting**, **memoization**, and additional best practices.
- Executed Git-based workflows for version control, collaborating effectively through **Git** and **GitHub** using feature branches, pull requests, and code reviews.

**Front end developer**, WorldWin Coder Pvt. Ltd. – Nashik June 2020 – July 2021

- Engineered and optimised scalable, high-performance front-end applications utilising React.js, guaranteeing compliance with modern JavaScript (ES6+) standards and best practices.

- Developed reusable, modular, and maintainable UI components adhering to component-based architecture to enhance application scalability and consistency.
- Collaborated with UI/UX, backend, and QA teams to ensure timely and high-quality feature delivery.

## Projects

---

### Barstool Social

Nov 2024 – July 2025

#### Project: Web-Based Business Management Portal

Developed a web-based portal that enables administrators to efficiently manage businesses or restaurants, including their offers, billing, and sales reports. The portal also provides business users with tools to create promotional offers, banners, and notifications, which are displayed on the customer-facing mobile app.

#### Key Contributions:

- Implemented **Stripe** for secure online payments.
- Utilized **Zustand** for efficient and scalable state management.
- Containerized the React application using Docker and served production build via Nginx for optimized deployment.
- Developed modular, reusable **UI components** for consistency and maintainability.
- Worked independently to deliver features end-to-end with minimal supervision.

**Tech Stack:** HTML5, CSS3, JavaScript, React.js, Vite, TypeScript, Zustand, Stripe, Tailwind CSS

### PredictScreen

May 2024 - Oct 2024

#### Project: Tenant Screening Platform with Multi-User Access

The portal facilitates subscribers in obtaining reliable tenant scoring and risk assessment reports. These insights help guide leasing decisions by offering a comprehensive understanding of potential tenant behavior.

#### Key Contributions:

- Managed server state efficiently using **TanStack Query (React Query)** and optimized API interactions, reducing redundant network requests and improving application performance.
- Built robust forms using **React Hook Form** with schema-based validation using **Yup**, ensuring accurate data validation and an improved user experience.
- Developed responsive and reusable UI components using **Material UI (MUI)** and reusable component architecture, ensuring design consistency and accelerating development across the application.

**Tech Stack:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React, React Router, TanStack Query (React Query), React Hook Form, Yup, Material UI (MUI), Vite, ESLint, Prettier

### CHRP

Feb 2023 - April 2024

#### Project: Portal to Manage Home Insurance Companies

Developed a web application for managing home insurance companies using **React.js**, **Redux**, and **Material UI**, enabling efficient administration, data management, and streamlined workflows.

#### Key Contributions:

- Executed role-based authentication and dynamic menus based on user roles.
- Developed a “**Custom Views**” feature allowing users to configure and save column order, sorting, and filters using the AG Grid library.
- Addressed and fixed a critical **XSS vulnerability** in the file upload module, significantly improving application security.
- Created modular and reusable **UI components** to ensure code maintainability and scalability.
- Resolved multiple production issues, enhancing system stability and improving overall user experience.
- Developed and delivered several features while collaborating effectively within Agile sprint cycles.

**Tech Stack:** HTML, CSS, JavaScript, React.js, Bootstrap, Material UI, AG Grid

## Achievements

---

- Recognized with multiple “**Extra Miler**” Awards for going above and beyond in delivering high-impact solutions and contributing to project success.
- **Commended by clients** for outstanding commitment to excellence and consistently exceeding delivery expectations.
