Summary

Software Engineer with 3 years and 6 months of experience developing responsive web applications using **React.js**, **TypeScript**, and **JavaScript (ES6+)**.
Experienced in building reusable UI components, integrating **RESTful APIs**, managing application state, and optimizing frontend performance to develop maintainable and scalable applications.
Working knowledge of backend technologies, including **Node.js**, **Express.js**, and **MySQL**, with an understanding of API development and backend workflows.
Familiar with **AWS services**, including EC2 and S3, and cloud deployment fundamentals.
Experienced in collaborating with **Agile teams** and cross-functional stakeholders to implement application features, resolve technical issues, and deliver software aligned with project requirements.

Education

Matoshri College of Engineering & Research Centre, Pune University Completed 2019

Bachelor of Engineering in Computer Science(Grade : First Class)

Skills

Frontend Development: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3
State Management: Redux, Zustand, React Context API
UI Libraries & Styling: Material UI (MUI), Tailwind CSS, Bootstrap, Semantic UI React, shadcn/ui
Frontend Architecture & System Design: Component-Based Architecture, Reusable UI Components, State Management, Performance Optimization, Responsive Design
API Integration: RESTful APIs, Asynchronous Data Fetching, API Error Handling
Development Tools: Git, GitHub, Vite, Webpack, ESLint, Prettier
Testing & Debugging: Jest, Unit Testing, Chrome DevTools, React Developer Tools
Backend & Databases: Node.js, Express.js, MySQL, MongoDB, PostgreSQL, Supabase
Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD Pipelines
AI-Assisted Development: GitHub Copilot, Cursor, Claude Code, ChatGPT

Experience

Software Engineer(React Js Developer), Winjit Technologies – Nashik Feb 2023 – July 2025

- Developed production-ready web applications using React.js, TypeScript, and JavaScript (ES6+), building maintainable frontend features and responsive user interfaces.
- Implemented reusable frontend components and independently delivered assigned features, following component-based architecture and maintainable coding practices.
- Integrated RESTful APIs and application state management to support data-driven workflows, synchronize frontend data, and handle asynchronous operations.
- Resolved frontend defects and technical issues in collaboration with cross-functional teams, improving UI reliability and supporting consistent feature delivery.

View Experience

Front End Developer, WorldWin Coder Pvt. Ltd. – Nashik June 2020 – July 2021

- Developed responsive, cross-browser interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3, ensuring consistent user experiences across devices.
- Integrated RESTful APIs to enable dynamic data rendering and seamless interaction between frontend components and backend services.

View Experience

Projects

Barstool Social Nov 2024 – July 2025

- Engineered a restaurant business management platform enabling administrators and restaurant owners to manage promotional offers, billing, sales reports, banners, and customer notifications.
- Improved React rendering performance by 30% through component optimization and reduced unnecessary re-renders, enhancing UI responsiveness.
- Implemented form validation using **React Hook Form** and **Yup** across 15+ forms, enforcing input validation rules and improving data-entry consistency across business workflows.
- Integrated authentication, payment processing, and REST API workflows to support secure access and platform functionality.

Tech Stack: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Vite, Tailwind CSS, TanStack Query, Zustand, React Hook Form, Yup, REST APIs, JWT, Stripe, Git, GitHub, Docker, CI/CD Pipelines

View Project

PredictScreen May 2024 – Oct 2024

- Implemented a tenant screening platform offering subscription-based risk assessments and scoring reports to help property managers make informed leasing decisions.
- Developed responsive interfaces for tenant evaluation data and screening workflows, supporting consistent experiences across 3+ screen sizes or device categories.
- Integrated REST APIs and established consistent code formatting and quality checks to improve maintainability throughout the development lifecycle.

Tech Stack: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Vite, Material UI (MUI), TanStack Query, React Hook Form, REST APIs, Git, GitHub, ESLint, Prettier, CI/CD Pipelines

View Project

CHRP Feb 2023 – Apr 2024

- Worked on insurance management platform for home insurance providers, covering policy administration, company operations, and role-based access control.
- Optimized data handling using AG Grid and React Redux to manage 200+ records per view and improve information navigation in insurance workflows.
- Developed data-driven interfaces to organize insurance records and simplify policy administration workflows.

Tech Stack: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Material UI, AG Grid, React Redux, CI/CD Pipelines

View Project

Achievements

- Recognized with multiple **"Extra Miler"** Awards for consistently delivering high-impact solutions and exceeding project expectations.
- Commended by clients for exceptional technical execution, ownership, and commitment to delivering high-quality software solutions.
- Earned the **AWS Certified Cloud Practitioner (Builder)** certification, demonstrating foundational knowledge of AWS cloud services, deployment models, security, and scalable cloud architecture.
