Summary

Experienced Software Engineer with 3 years and 6 months of hands-on experience in building responsive, high-performance web applications using **React.js**, **TypeScript**, and **JavaScript (ES6+)**. Skilled in creating scalable frontend architectures with React.js, focusing on **component-based development**, **API integration**, and **performance optimization**. Knowledge in backend technologies such as **Node.js**, **Express.js**, **Mysql** with a solid understanding of building **RESTful APIs** and backend workflows. Familiar with **AWS services** such as EC2, S3, and basic deployment practices, with an understanding of cloud-based application architecture and scalability. Quick to learn and adapt to new technologies, with strong experience working independently and within **Agile teams**, along with excellent **client communication** and **cross-functional collaboration** skills.

Education

Matoshri College of Engineering & Research Centre, Pune University, Completed 2019
Bachelor of Engineering in Computer Science(Grade : First Class)

Skills

Frontend Skills: HTML5, CSS3, JavaScript (ES6+), TypeScript
Frontend Frameworks & Libraries: React.js, Next.js
State Management: Redux, Zustand, React Context API
UI Component Libraries: Material UI (MUI), Bootstrap, Tailwind CSS
Build Tools & Package Managers: Vite, npm, Webpack, Babel, ESLint, Prettier
Testing & Performance: Jest, Unit Testing
Cloud & Deployment: Docker, CI/CD pipelines, AWS (Amazon Web Services)
Version Control & Collaboration: Git, GitHub
Browser Tools & Debugging: Chrome DevTools, React Developer Tools
Backend Technologies: Node.js, Express.js, RESTful APIs, MVC Architecture
Databases & Design: MongoDB, Database Schema Design, Mysql, Database Design
Development Tools: Visual Studio Code, Postman, Jira, DBeaver
Methodologies & Practices: Agile, Scrum, Code Reviews, Pair Programming, Accessibility (WCAG)

Experience

Freelance Frontend Developer, CA Firm Nov 2025 – Mar 2026
Engineered a scalable **Audit Query & Resolve Management System (AQRMS)** using **React.js**, **TypeScript**, **Node.js**, and REST APIs, delivering secure role-based workflows and enterprise-grade document management.
[View Detailed Experience](#)

Software Engineer, Winjit Technologies – Nashik Feb 2023 – July 2025
Developed scalable, high-performance React applications using **React.js**, **TypeScript**, Redux, Zustand, REST APIs, and modern frontend architecture with a focus on performance optimization and reusable components.
[View Detailed Experience](#)

Front End Developer, WorldWin Coder Pvt. Ltd. – Nashik June 2020 – July 2021
Built responsive, cross-browser web applications using **React.js**, JavaScript, HTML5, CSS3, and REST APIs while collaborating with cross-functional teams to deliver intuitive user experiences.

Projects

Barstool Social

Nov 2024 – July 2025

Developed a business management platform for administrators and restaurant owners to manage offers, billing, sales reports, banners, and customer notifications, streamlining daily operations and promotional campaigns.

[View Project](#)

PredictScreen

May 2024 – Oct 2024

Built a tenant screening platform that provides subscriber-based risk assessment and tenant scoring reports, enabling property managers to make informed leasing decisions through a secure and intuitive web application.

[View Project](#)

CHRP

Feb 2023 – Apr 2024

Engineered a web-based insurance management platform that simplifies policy administration, company management, role-based access, and business workflows for home insurance providers.
